### WORK EXPERIENCE

#### Software Development Engineer

Amazon.com - September 2010 to June 2014

Worked on the EVE (Ebook Vendor Experience) team, developed front end UIs that allowed publishers to provide Amazon with ebook content and metadata that we would then translate for consumption by downstream teams to store, process, and ultimately publish the content.

#### Software Development Engineer

Microsoft Corporation - March 2008 to September 2010

Worked with a build team, migrated teams to TFS, maintained and developed the build process using primarily MsBuild and powershell, and with C# maintained and developed tools to track metrics, and ease developer teams into the transition, and support them throughout it.

#### Application Developer

Avue Technologies Inc - June 2007 to February 2008

Utilized Java to design and develop features and components with other developers and independently for client applications.

#### Electrical Power Production Apprentice

US Air Force - September 2003 to September 2005

Generator Maintenance, overhaul fuel injectors, fuel pumps, fan hubs, general maintenance and assurance.

### EDUCATION

#### B.S. in Computer Software Systems

University of Washington - Tacoma, WA  
January 2006 to March 2008
